

iMazing - Get Tango on your iPhone

Dear Tango streamer. If you are using iPhone, but cannot download the application from the AppStore, there is a solution for you.

All you need is a friend who has an iPhone with Tango application installed, and a computer.

Please make sure that you are using the free version of iMazing app.

Choose the OS of your **computer**:

[Mac OS](#)

[Windows](#)

Mac OS

1. First of all you need to download iMazing.
iMazing is a program, that will help you to get the application from your friend's phone to your phone. Click on the link, and download the program for your computer:

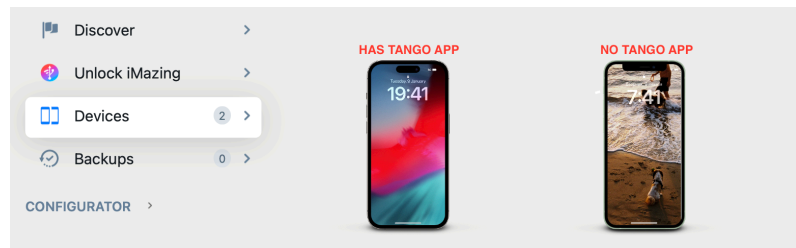

iMazing | iPhone, iPad & iPod Manager for Mac & PC
iMazing lets you transfer music, files, messages, apps and more from any iPhone, iPad, or iPod to a computer, Mac or PC. Manage and backup your iOS device simply without
<https://imazing.com/>

2. After you download iMazing, you need to install it, like you install any other program.

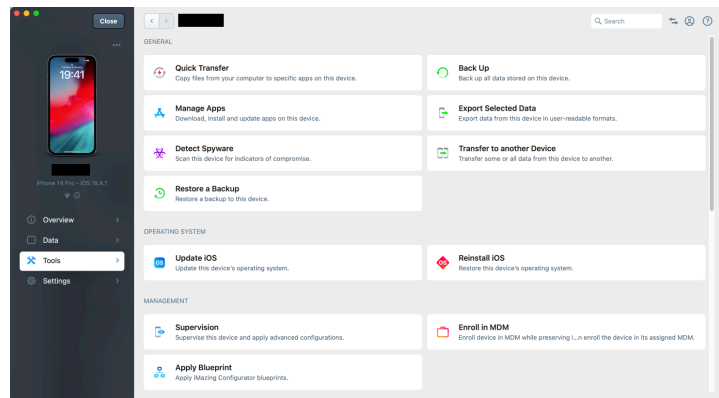

3. Now you need to **connect** the device that has Tango Application to the computer **with a cable**
4. Open iMazing, and choose "**Devices**"

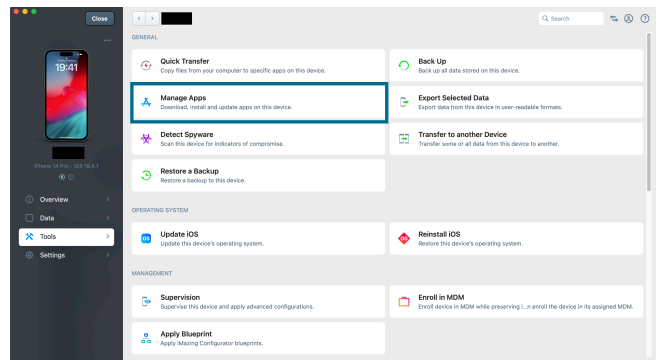

5. Now we need to choose a phone that already has Tango Application.

6. Press **"Tools"** button

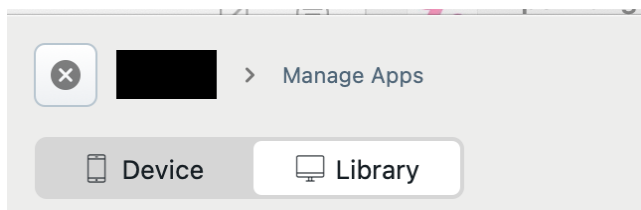

7. Select **"Manage Apps"**

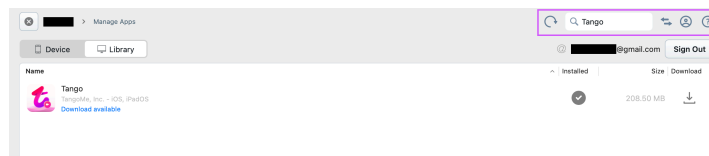

8. Here the program will load for some time, because it needs to understand, what applications there are on this phone. After it finishes loading, you will get a list of applications on this phone.

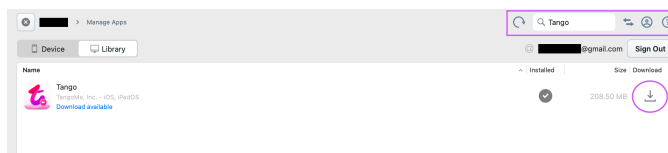

9. You need to press "Library" button

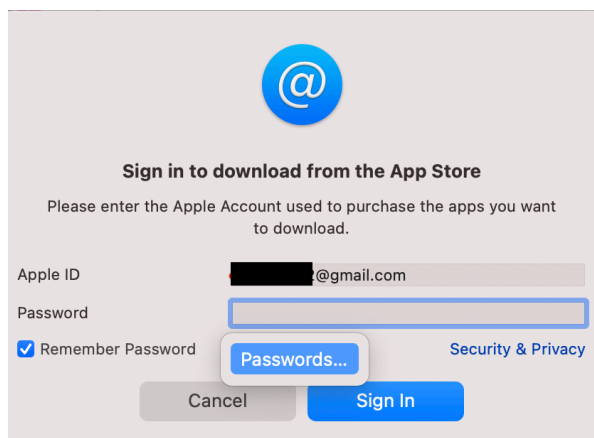

10. And search for "Tango" application.

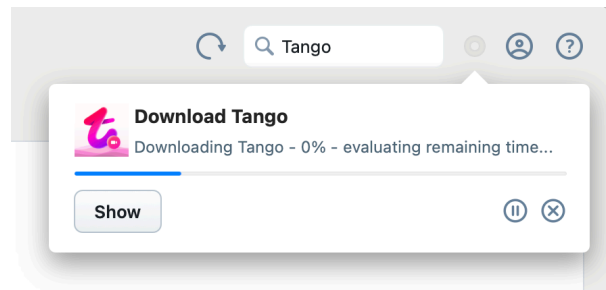

10. Click "Download"

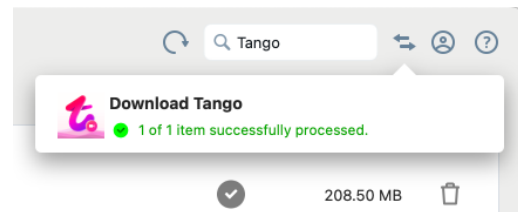

11. Ask your friend to log into their Apple account. It is only needed to get permission to download the application.

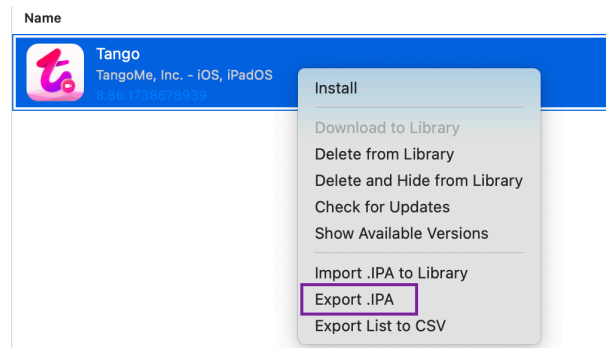

12. Tango application will start downloading, so please wait a little bit.

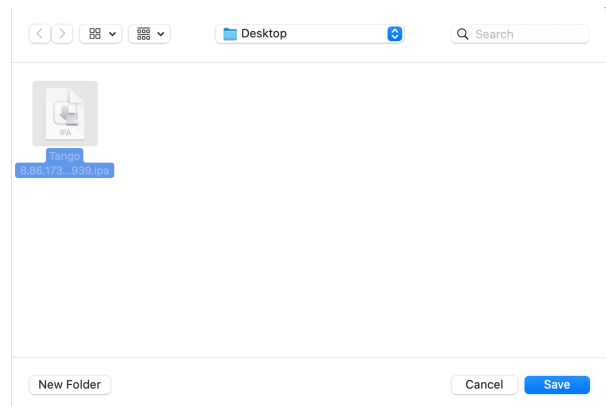

13. If you see a small trash bin icon, it means Tango is downloaded

14. So now **right click** on the Tango application and choose **Export .IPA**.

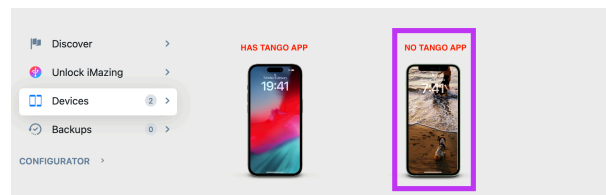

15. Save file on your computer

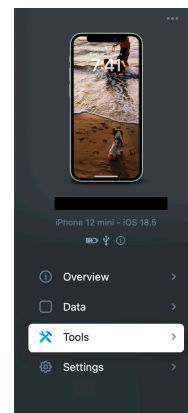

16. Disconnect iPhone that has Tango application from computer.

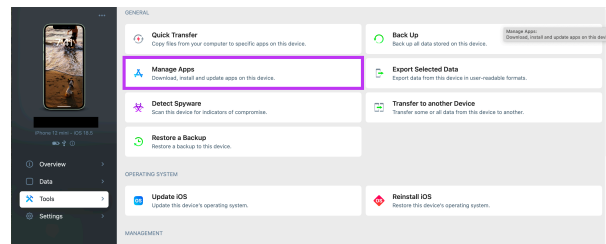

17. Connect your iPhone to the computer with a cable, like you did with a first iPhone.

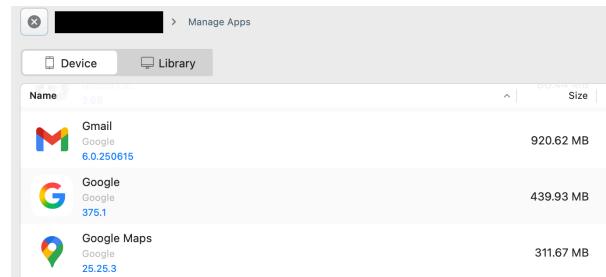

18. Select "Tools"

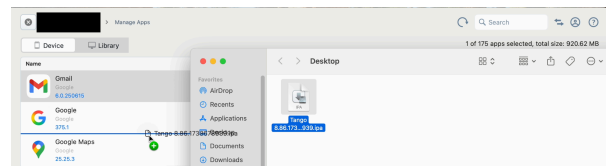

19. Select "Manage Apps" and wait once again for the applications to load.

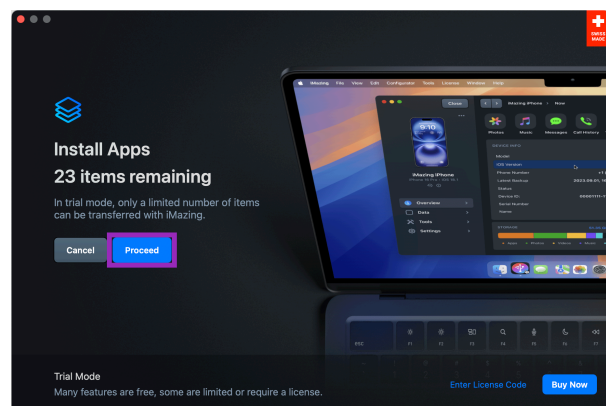

20. Select "Device"

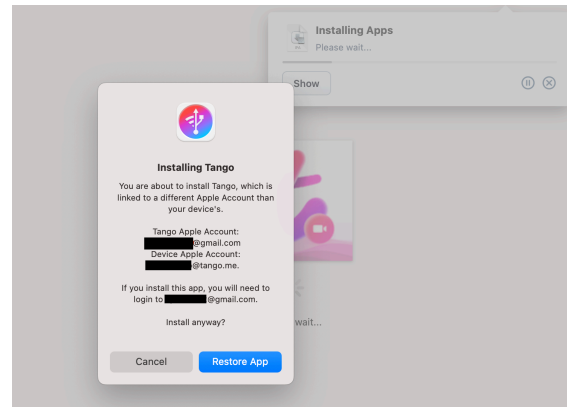

21. Drag file (from step 15) from computer to your iPhone

22. Choose "Proceed"

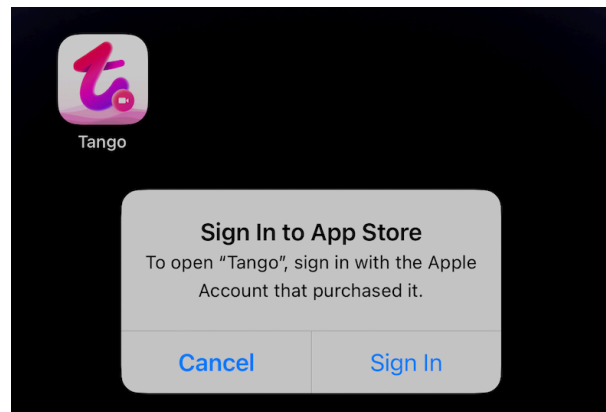

23. Press "Restore App"

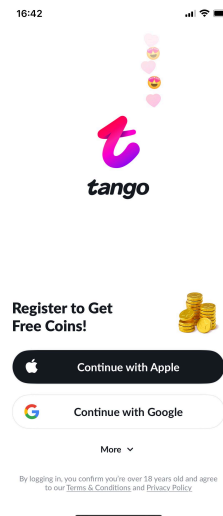

24. Wait for the installation.

25. Disconnect the phone from the computer.

26. Open the app on the iPhone. Ask your friend to log in once again. You only need it to get a permission for this application to start on the iPhone

27. You can now create an account on Tango or log in into an existing account.

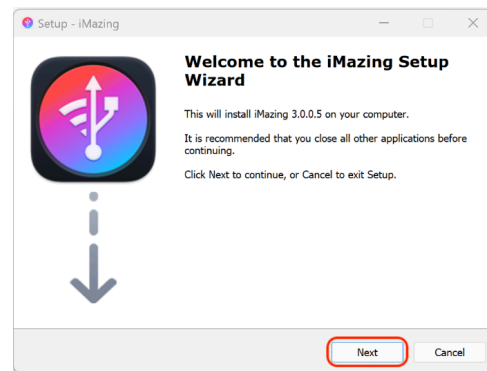

Windows

1. First of all you need to download iMazing. iMazing is a program, that will help you to get the application from your friend's phone to your phone. Click on the link, and download the program for your computer:

iMazing | iPhone, iPad & iPod Manager for Mac & PC
iMazing lets you transfer music, files, messages, apps and more from any iPhone, iPad, or iPod to a computer, Mac or PC. Manage and backup your iOS device simply without
 <https://imazing.com/>

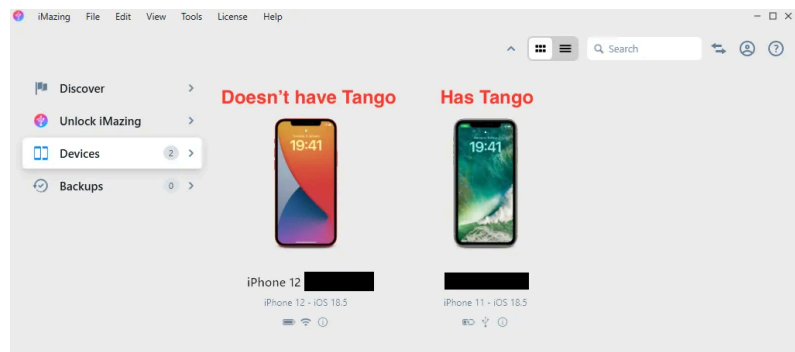

2. After you download iMazing, you need to install it, like you install any other program.

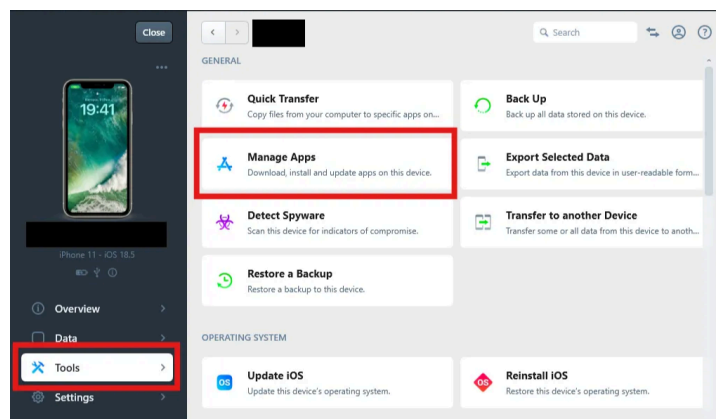

3. Now you need to **connect** the device that has Tango Application to the computer **with a cable**

4. Open iMazing, and choose **"Devices"**

5. Now we need to choose a phone that **already has** Tango Application.

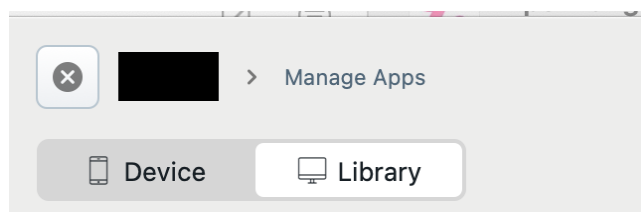

6. Press **"Tools"** button and select **"Manage Apps"**

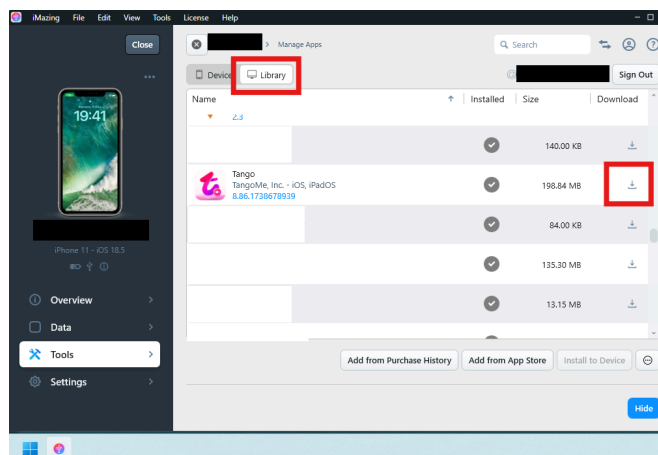

8. Here the program will load for some time, because it needs to understand, what applications there are on this phone. After it finishes loading, you will get a list of applications on this phone.

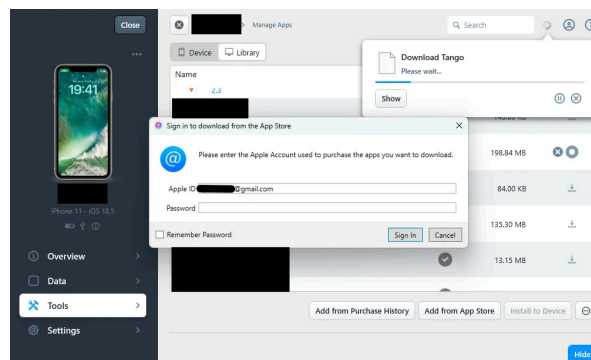

9. You need to press "Library" button

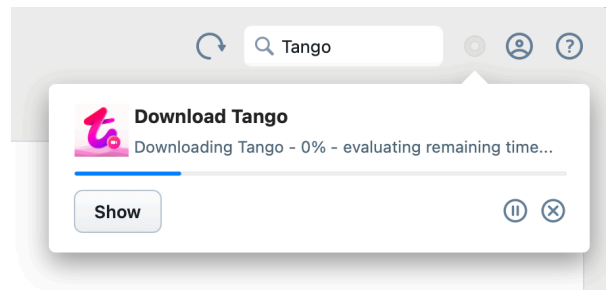

10. Find Tango app, and press "download"

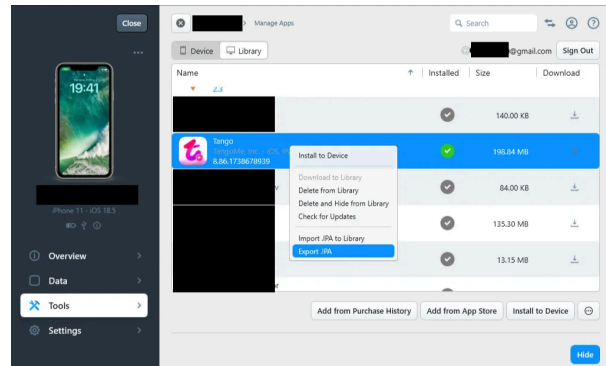

11. Ask your friend to log into their Apple account. It is only needed to get permission to download the application.

12. Tango application will start downloading, so please wait a little bit.

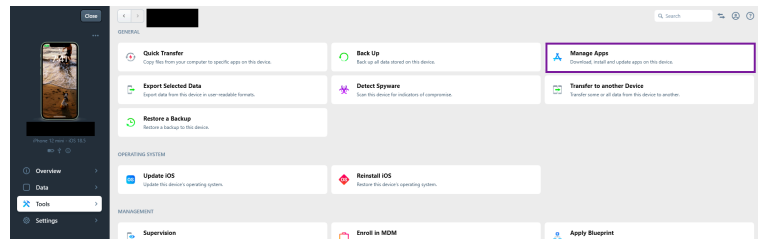

13. After you download Tango, click with the right button, and press **Export .IPA**

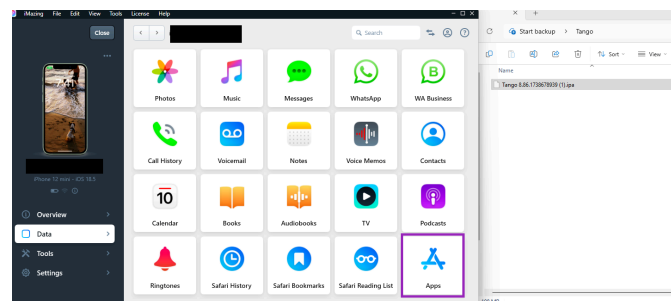

14. Connect the device that **doesn't have** Tango app to the computer

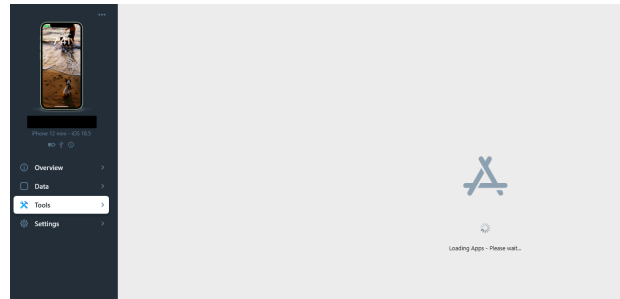

15. Open "Manage Apps" section

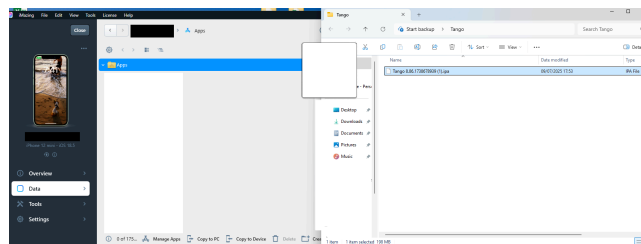

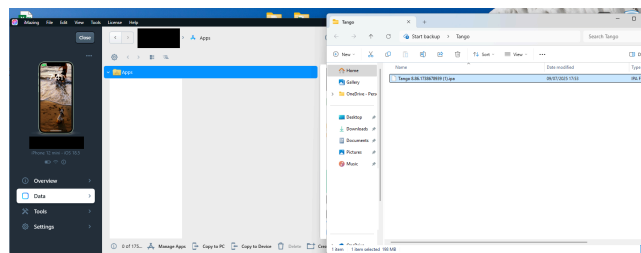

16. Open the "Apps" section

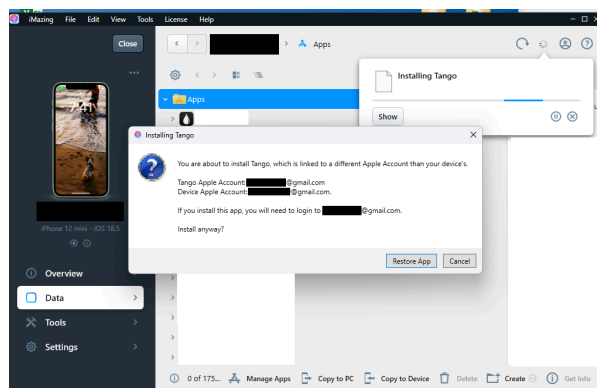

17. Wait a bit — the program needs to get information about all of your applications.

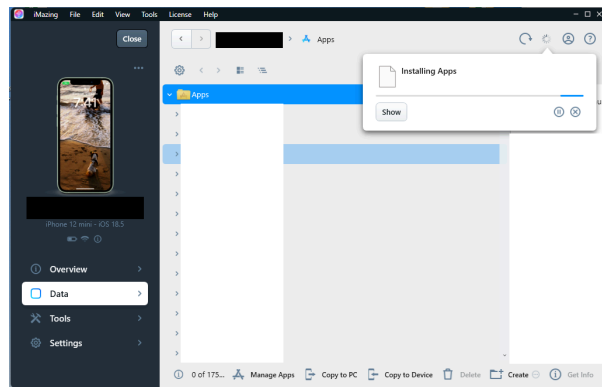

17. Drag the Tango app into the Applications section of the connected device.

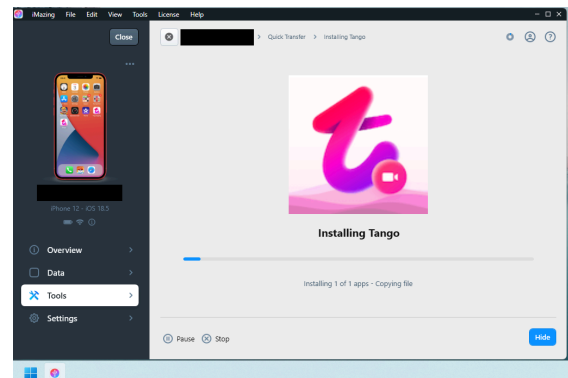

17. Confirm the installation

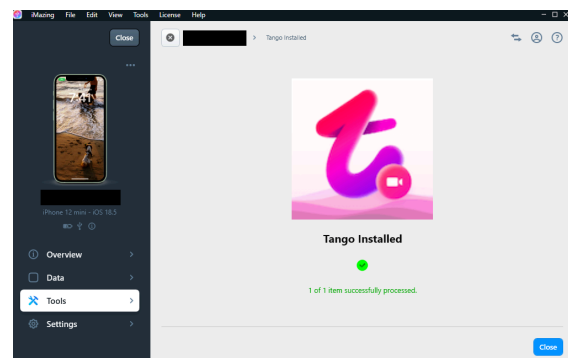

18. Wait for the program to start installation

19. Wait for the installation to complete

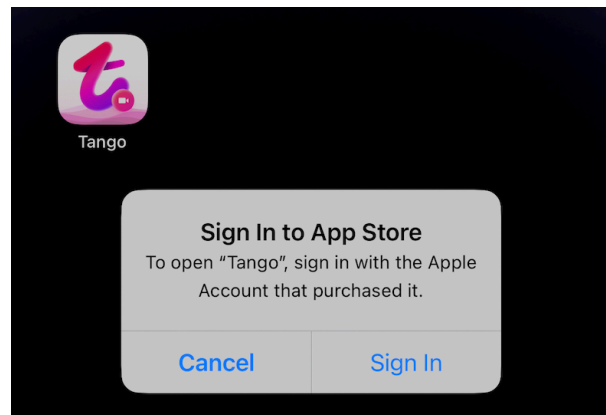

20. Tango is installed!

21. Disconnect the phone from the computer.

22. Open the app on the iPhone. Ask your friend to log in once again. You only need it to get a permission for this application to start on the iPhone

23. You can now create an account on Tango or log in into an existing account.
